DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 17, drawn to a remote control indicating progress status, classified in class 340, subclass 999.
- II. Claims 6-10, drawn to interactive television system for watching television programs, classified in class 725, subclass 40.
- III. Claims 11-16, 19, drawn to electronic commerce, classified in class 705, subclass 26.
- IV. Claim 18, drawn to a mouse, classified in class 345, subclass 163.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each group is not required for each of the other groups, restriction for examination purposes as indicated is proper.

A telephone call was made to Laurie E. Gathman on 5/20/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
